

DP7010 Firmware Update Items

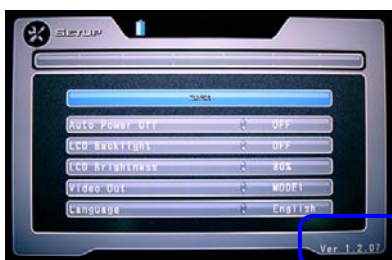

Version 1.2.07

Newly added function as the following:

1. VIDEO: Supports DivX6 format files (*.divx).
2. VIDEO: Able to switch sound track and subtitles under [VIDEO/Effect Menu] with DivX6 files during movie playback, under conditions that the DivX6 file incorporates multi-language subtitle and sound track.

3. VIDEO: Time display disappears after 5 seconds of movie playing. If you need to indicate the time display during the movie, simply press "Play/Pause Button" twice or press "3-way select button" twice to reappear the time display.
4. SETUP: Firmware version is displayed within [SETUP/Function Menu] on the lower right corner of the screen.

5. VOICE REC: Corrected the glittering problem of the recording time display during VOICE REC with "Line In" audio source.
6. PVR: Corrected the problem with green interference when recording with PAL system under VGA 640x480 resolution settings.
7. OTHERS : Corrected possible problems with Photo unction created by setting "Repeat ALL" under VIDEO and MUSIC Functions.

NOTE

* To ensure smooth playback, suggested Bit Rate for movie files for firmware 1.2.05 are listed as the following chart:

MPEG-4 Format	Bit Rate
DivX 6 (*.divx)	Less than 2M
DivX 3.11/4.x/5.x (*.avi)	Less than 2M
MPEG-4 SP (*.asf)	Less than 1.5M

(Only modified items are listed here, for further detail please check with our user manual.)
