

How to Update MP4 Player Firmware

-- Ver1.1.21 to Ver1.2.07

Note

1. Download the latest firmware from official website. (DPv1.2.07_for_1.1.21_eng.zip)
2. Please make sure that Power Adaptor is always plugged in to ensure sufficient power supply during the process of firmware upgrade.

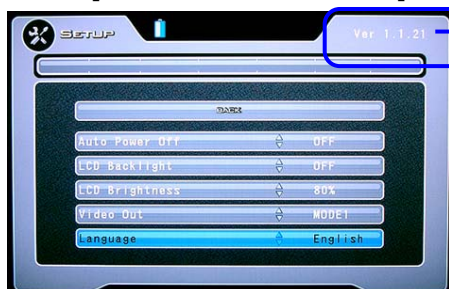

Installation Guide

1. Connect MP4 Player with Power Adaptor and turn the device on.

* If your [Main Menu] of the MP4 Player is different from this image, please DO NOT use this version of firmware to upgrade to avoid possible severe damages to your MP4 Player. You will have to send your MP4 Player back to the original manufacturer at some cost to repair. Warranty does not include conditions such as repairing for firmware upgrade failure.

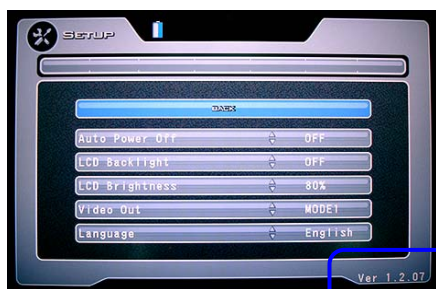

2. Enter [SETUP/Function Menu]

Firmware Version: Ver1.1.21

* If your MP4 Player doesn't show your firmware version, or if yours isn't Ver1.1.21, please DO NOT use this version of firmware to upgrade to avoid possible severe damages to your MP4 Player. You will have to send your MP4 Player back to the original manufacturer at some cost to repair. Warranty does not include conditions such as repairing for firmware upgrade failure.

3. Press "Stop/Back button" to return to [Main Menu]
4. Connect MP4 Player and PC via Mini-USB Cable. A new USB device dialog will pop out on your PC screen.
5. Unzip the latest firmware file and transmit the file "update.bin" to the root path of MP4 Player.
6. Unplug Mini-USB Cable. When the "USB" icon disappear, then enter [SETUP/Function Menu].
7. Scroll up/down "3-way select button" to highlight "Firmware Update" item. Press "3-way select button" once to confirm this item, the "Firmware Update" Message will appear on the screen.
8. Scroll up/down "3-way select button" to select "V" (YES) icon. Press "3-way select button" once to confirm update firmware now. DO NOT touch any button while the system is still updating the firmware.
9. After 3-5 minutes, the system will shut down by itself.
10. Restart the MP4 Player after about 2 min and enter [SETUP/Function Menu]. The Firmware Version will be listed as Ver1.2.07. Now the firmware update procedure is completed, and you can use all the features of the new firmware.

Firmware Version: Ver1.2.07
