MobiNote Technology Awarded iF Design Award For Its High-Resolution PMP Next Generation Models Announced At Cebit 2005

MobiNote Technology Corporation announces that its 7-inch Portable Media Player (PMP) MobiNote DP7010 was awarded iF Design Award from the Industry Forum of Germany, and announce 3 new PMPs at CeBIT 2005 as well. These models come with built-in stereo speakers, 40GB hard drive, and DRM (Digital Right Management) solutions. Founded in 2003, MobiNote Technology positions itself as an entertainment solution provider and devotes to the R&D and global marketing of portable multimedia players (PMP). Also an expert in developing value-added applications friendly user interfaces, MobiNote Technology provides multimedia integration solutions for the ODM and OEM market and develops fashionable delicate consumer electronics.

MobiNote DP7010

The MobiNote DP7010, a 7-inch MP4 player equipped with the top-quality LTPS (Low Temperature Poly Silicon) screen and advanced MPEG-4 compression technology for playing MP4 videos in a wide screen format (16:9). Furthermore, the

DP7010 has a wide viewing angle of up to 170°, which is ideal for movie appreciation. Compared to the pocket-size PMPs, the DP7010 has a resolution of 400% to give live video and audio effects like seeing a movie at the cinema. The built-in 20GB hard drive, MP3 player, photo viewer, voice recorder, and digital video recorder in the DP7010 (operable in energy-saving mode through the user-friendly interface) fulfills the demands of users asking for a fully-functional personal multimedia center.

The MobiNote DP7010 sports a simple North European design and style. All of the operating buttons are designed on the side of the player, enabling the flat surface of the 16:9 digital wide-screen to remain complete. The front of the player is coated with a white varnish to emphasize the modern sense of brightness and simplicity. The back of the player adopts a misty-surface design with skid-proof rubber pads to enhance shockproof stability when the MobiNote DP7010 is held in the hand. On the operating design, a silver-gray misty-surface material is selected to add to the simple, low-

profile style of the player. With the shape of the player designed to balance the curves and smoothness of the MobiNote DP7010, not only is the physical weight of the player reduced, but the portability of the player is also enhanced.

The MobiNote DP7010 has a "one-click" user-friendly human interface button which eliminates the difficulties of learning and using the device. Its operating display is designed with familiar looking icons. Operation is a breeze by just rolling and clicking the unique "Fly-Roll" on the side of the device.

About MobiNote Technology

MobiNote Technology Corp., founded in 2003, position as Entertainment Solution Provider, aims to develop intelligent portable device, integrated with value-added application software to provide a friendly user interface system solution for end users and enterprise
