HIP TO BE CURVED **Hipper 100 £40**

www.playengine.co.uk

Light and sound go together like your liver and a nice Chianti, so it's only natural that Hipper's 100 exploits this near-perfect relationship. Plug an MP3 player or MP3-carrying USB stick into its waiting port and it'll pull off tracks, play them through its built-in speakers and unite them with rhythmically pulsing light patterns. Although we haven't tried it, we predict the changing colour pattern associated with a Chicco track resembles the searing fires of hell.
